EPA's BEACH Report: California 2009 Swimming Season

May 2010

Introduction

The BEACH Act of 2000 requires that coastal and Great Lakes states and territories report to EPA on beach monitoring and notification data for their coastal recreation waters. The BEACH Act defines coastal recreation waters as the Great Lakes and coastal waters (including coastal estuaries) that states, territories, and authorized tribes officially recognize or designate for swimming, bathing, surfing, or similar activities in the water.

This fact sheet summarizes beach monitoring and notification data submitted to EPA by the State of California for the 2009 swimming season.

Figure 1. California coastal counties.

Table 1. Breakdown of monitored and unmonitored coastal beaches by county for 2009.

| County | Total Beaches | Monitored | Not Monitored |
|-----------------|---------------|------------|---------------|
| DEL NORTE | 12 | 12 | 0 |
| HUMBOLT | 28 | 28 | 0 |
| LOS ANGELES | 50 | 50 | 0 |
| MARIN | 28 | 28 | 0 |
| MENDOCINO | 21 | 21 | 0 |
| MONTEREY | 25 | 25 | 0 |
| ORANGE | 24 | 24 | 0 |
| SAN DIEGO | 77 | 77 | 0 |
| SAN FRANCISCO | 7 | 7 | 0 |
| SAN LUIS OBISPO | 17 | 17 | 0 |
| SAN MATEO | 41 | 41 | 0 |
| SANTA BARBARA | 34 | 34 | 0 |
| SANTA CRUZ | 28 | 28 | 0 |
| SONOMA | 7 | 7 | 0 |
| VENTURA | 35 | 35 | 0 |
| TOTALS | 434 | 434 | 0 |

2009 Summary Results

How many notification actions were reported and how long were they?

California's approach is to issue a beach advisory when water quality standards are exceeded at a particular beach that warns people to avoid contact with the water. A total of 173 monitored beaches had at least one advisory issued during the 2009 swimming season. Figure 2 presents a full breakdown of notification action durations.

What percentage of days were beaches under a notification action?

For California's 2009 swimming season, actions were reported about 6 percent of the time (Figure 3).

How do 2009 results compare to previous years?

Table 2 compares 2009 notification action data with monitored beach data from previous years.

What pollution sources possibly affect investigated monitored beaches?

Every investigated monitored beach indicated that unidentified sources affected their beach (Figure 4).

Figure 3: Beach days with and without notification actions.

Table 2. Beach notification actions, 2007-2009.

| | 2007 | 2008 | 2009 |
|---|------|------|------|
| Number of monitored beaches | 424 | 433 | 434 |
| Number of beaches affected by notification actions | 138 | 139 | 173 |
| Percentage of beaches affected by notification actions | 33% | 32% | 40% |
| Percentage of beach days affected by notification actions | 5% | 6% | 6% |

Figure 4: Percent of investigated monitored beaches affected by possible pollution sources (434 beaches).
